

EDIBLE FILMS

Edible delivery systems by JRF Technology

Edible Packaging by JRF Technology

Revolutionize product delivery with JRF Technology's edible, water-soluble packaging films, engineered to be integrated into versatile formats, including stick packs, pods, sachets, and more. Our customizable films provide brands with flexible delivery options that support sustainable practices and minimize waste.

Key Features

- **Accurate Dosing:** Ensures precise, pre-measured quantities of food, supplements, or nutrients in each use.
- **Convenient & Portable:** Single-use, compact packaging ideal for on-the-go applications
- **Eco-Friendly Design:** Dissolvable materials reduce environmental impact and eliminate layers of packaging waste.
- **Customizable Ingredients & Formats:** Tailored to a wide range of ingredients, flavors, and shapes, ideal for food, supplements, and functional nutrition.

Applications

- **Food & Beverage:** Single-use servings of powdered ingredients for instant, easy consumption.
- **Supplement & Nutraceuticals:** Efficient delivery of functional ingredients for wellness and health on-the-go without waste or mess
- **Specialty Formats:** Customizable for different formats, enabling portability and versatile dose sizes.

Innovate with JRF Technology Partner with us to develop sustainable, edible packaging solutions that elevate your brand with waste-free, user-friendly delivery systems tailored to modern consumer needs.
